## COMPOSITE DECKING WITH A WOOD-GRAIN TEXTURE

WOLF'S MOLD- AND MILDEW-RESISTANT TERRACE DECKING IS IMPERVIOUS TO MOISTURE

Wolf's new Terrace composite decking comes in five different colors, including pumice and almond. According to the manufacturer, it's a natural fiber-polymer composite made in the U.S. with what the company calls stranded-core technology. The composite core is wrapped with a resin capstock that has a deeply-embossed variegated wood-grain texture. The  $\frac{7}{8}$ -inch-by- $5\frac{1}{2}$ -inch decking is available in 12-foot, 16-foot, and 20-foot lengths, and in both grooved and square-edge versions. Matching  $\frac{1}{2}$ -inch-by- $11\frac{1}{4}$ -inch-by-12-foot rim boards are also available. The decking has a 25-year warranty against stains and fading. ## CORROSION-PROOF SCREW ANCHORS

SIMPSON STRONG-TIE TITEN HD SCREW ANCHORS FEATURE A CARBON-STEEL HELICAL-COIL THREAD BRAZED INTO A STAINLESS STEEL SHANK

Deck builders working near the coast will be interested in Simpson Strong-Tie's new Titen HD heavy-duty screw anchors for concrete and masonry. Made with Type 316 stainless steel, the screws' proprietary bi-metal design features a carbon-steel helical-coil thread brazed into the stainless steel shank of the anchor, rather than a full carbon steel segment welded onto the end of the anchor. According to the manufacturer, a  $\frac{1}{2}$ -inch-by-5-inch THDSS screw anchor contains less than 1% carbon steel while other stainless steel screw anchors of the same size can contain up to 18% carbon steel, which can expand and crack the surrounding concrete as it corrodes. Titen HD screw anchors can be installed with an impact wrench or a hand tool. [strongtie.com](http://strongtie.com)

### **CABINETS FOR A MODERN OUTDOOR KITCHEN**

KALAMAZOO'S STAINLESS STEEL KITCHEN CABINETS CAN BE PAIRED WITH WOOD OR COLORFUL POWDER-COATED PANELS

The Arcadia Series from Kalamazoo Outdoor Gourmet offers a contemporary look. Stainless steel detailing pairs with oiled ipe panels (shown) or with powder-coated stainless-steel panels in more than 200 colors. Storage cabinets range from 12 to 36 inches, and cooktop and sink base cabinets from 24 to 36 inches; options include three drawers, drawer-over-door, and pullout racks. Available August 2017. ### **MIRROR-FINISH RAILINGS**

AGS STAINLESS NOW OFFERS A HIGH-POLISH FINISH ON ITS RAILING PRODUCTS

A highly-polished finish option is now available on all AGS Stainless railing products. The company builds custom prefabricated residential and commercial railing systems using A316 marine-grade stainless steel, and says that the mirror finish offers additional corrosion protection for projects in coastal environments. ### **PHOTOREALISTIC DECKING**

PALRAM'S MIRRITE PVC DECKING IS IMPRINTED WITH IMAGES OF IPE, TEAK, OR BLACK WALNUT

Palram calls its new Mirrite product "outdoor flooring" rather than decking, with each PVC board printed with the image of an ipe, teak, or black walnut board on its surface. The boards are topped with what a company rep described as a transparent shell that protects the surface and provides fade and stain resistance. The company claims that the shell is impervious to common staining agents, including sunscreen, bug spray, citronella, and charcoal fluid. Boards come in 12-, 16-, and 20-foot lengths, with prices that are comparable to high-end composites. [mirrite.com](http://mirrite.com) ❖
